Stronger together – Venator Wasserchemie becomes Feralco Wasserchemie

Nienburg/Weser, 01.06.2021. Two leading companies in their sector – Feralco Group and Venator Wasserchemie – are joining forces. With this merger, the two companies are taking the opportunity to strengthen their respective market positions in Germany and other national markets for the long term.

In acquiring Venator Wasserchemie, the Feralco Group is increasing its expertise, product range and geographical coverage. This combination provides opportunities to better serve our respective customer bases with enhanced and more competitive offerings into the future.

“Thanks to our expanded range of products, our customers can look forward to more comprehensive advice and even better solutions to meet their needs”, says Sascha Gerull, Managing Director of Feralco Deutschland GmbH.

With improved geographical cover, Feralco will be able to offer greater proximity to customers, improved service and greater levels of customer support. By integrating within an existing European production network, with the addition of three additional sites across Germany, the company can offer an extremely high security of supply, faster delivery times and a reduction in its carbon emissions with shorter transport routes.

Feralco Deutschland GmbH is a subsidiary of the Feralco Group, headquartered in Helsingborg, Sweden. The group is a leading manufacturer of high performance water treatment and process chemicals. Our products are used in drinking and wastewater sectors, but also in paper and in other industries. The Feralco Group has production units in Germany, France, the UK, Italy, the Netherlands, Sweden, Switzerland and Spain, and commercial activities in many other countries. This presence across Europe guarantees fast delivery times, a local personal service, and excellent flexibility.
